Learn a framework that helps give meaning and depth!

This workshop explores the social role valorisation framework with regard to people who are marginalised.

It helps to make the most of contemporary opportunities.

Appreciate the dynamics of social devaluation and its impacts on marginalised people. Examine how getting valued roles can contribute to changed societal perceptions and strengthen the likelihood that the person with a devalued status will get a better life. Completion of this event allows entry to the 5-day PASSING practicum.
